

Hillside Pink Sheffield Mum

Chrysanthemum 'Hillside Sheffield Pink'

Plant Height: 10 inches

Flower Height: 18 inches

Spread: 18 inches

Sunlight: ☉

Hardiness Zone: 4b

Other Names: Garden Mum, Korean Mum, Dendranthemum

Description:

This variety produces stunning soft pink and white blooms with peach overtones and golden centers; flowers completely cover this perfectly mounded plant from late summer until frost; adaptable to various conditions; best in full sun

Ornamental Features

Hillside Pink Sheffield Mum is covered in stunning shell pink daisy flowers with white overtones, gold eyes and peach streaks at the ends of the stems, from late summer to late fall, which emerge from distinctive coral-pink flower buds. The flowers are excellent for cutting. Its fragrant ferny leaves remain dark green in color throughout the season.

Landscape Attributes

Hillside Pink Sheffield Mum is an herbaceous perennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Hillside Pink Sheffield Mum is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Hillside Pink Sheffield Mum will grow to be about 10 inches tall at maturity extending to 18 inches tall with the flowers, with a spread of 18 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Hillside Pink Sheffield Mum is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
