

Husker's Red Beardtongue

Penstemon digitalis 'Husker Red'

Plant Height: 24 inches

Flower Height: 3 feet

Spread: 15 inches

Spacing: 18 inches

Sunlight: ☉ ●

Hardiness Zone: 3b

Other Names: Beard Tongue

Ornamental Features

Husker's Red Beardtongue has masses of beautiful spikes of white tubular flowers rising above the foliage from early to mid summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its attractive narrow leaves emerge burgundy in spring, turning dark green in color with distinctive deep purple edges throughout the season. The deep purple stems are very colorful and add to the overall interest of the plant.

Landscape Attributes

Husker's Red Beardtongue is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Husker's Red Beardtongue is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Husker's Red Beardtongue will grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 15 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selection of a native North American species. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Husker's Red Beardtongue is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

Sizes Available:

4.5" CONT \$6.49 / #1 CONT \$12.99 / 8" CONT \$14.99
