

Greenlee Hybrid Moor Grass
Sesleria 'Greenlee'

Plant Height: 8 inches

Flower Height: 12 inches

Spread: 18 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: 5a

Other Names: John Greenlee's Moor Grass

Description:

An evergreen, clumping blue-green grass that is very good for mass planting as a groundcover; pale purple-tinged flowers in spring and summer; tolerates a wide range of conditions; a colorful edging, or accent in the garden or border

Ornamental Features

Greenlee Hybrid Moor Grass has masses of beautiful spikes of purple flowers with rose overtones from late spring to mid summer, which are most effective when planted in groupings. Its attractive grassy leaves remain bluish-green in color with hints of powder blue throughout the year.

Landscape Attributes

Greenlee Hybrid Moor Grass is an herbaceous evergreen perennial grass with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and should not require much pruning, except when necessary, such as to remove dieback. It has no significant negative characteristics.

Greenlee Hybrid Moor Grass is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover

Planting & Growing

Greenlee Hybrid Moor Grass will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is an amazingly adaptable plant, tolerating both dry conditions and even some standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
